PROFILE

I'm an engineer with 5 years of experience, on part time and on full time jobs. I have worked on web development from Wordpress, PHP to JavaScript, React. A full-stack developer that is focused on Javascript technologies. Decentralization and cash-less adherent.

Colleagues know me as a reliable engineer who can always be counted to keep the job done. Good code is important for me, and I always look for opportunities to improve. I can (and often do) work well alone, but I'm at my best collaborating with others.

EXPERIENCE

Director of Product Development, Unosoft Labs — November 2018–Present

He is the show-runner in the team. He has worked with Nap - his mentor with twenty years of experience in the IT industry since he graduated at University of Santo Tomas, Philippines. Together, they find new talent and mentor them by example. He inspires the team by emboldening them of their potential with his natural appeal and command.

Marketing Associate, Pearl Pay Inc. — June 2018 - November 2018

Responsible for assisting the planning and execution of marketing activities. Implemented product website, marketing campaign to schools and clientele.

Software Engineer, Unosoft Labs — January 2018 - June 2018

Together with a team, built a platform is devised for medical professionals with Javascript frameworks, namely jQuery, Node, MongoDB and Ionic with Angular.

Web Developer, Adroit Apps Ltd — June 2017- December 2017

Using AEM, Adobe Experience Manager, as a platform and creating a theme for a website, Front-end work. Styling and scripting, documentation, project management, project presentation and platform tutorial.

Software Engineer, Mr. Geek Mobile Solutions — June 2016- 2017

Responsible for the complete life cycle of a software product, from research and design to implementation, training and support. Created project proposals on Keynote. Provide support on network and office troubleshooting. Pitched ideas to team and clients.

Web Developer, SOLUS Interactive Inc. — February 2015- July 2015

Part-time and Intern, creating websites themes powered by WordPress.
Created a raffle system in PHP.
